

Ratepayers' Meeting Passes off Quietly

Officials Thanked For Work
Done During Year

The annual ratepayers' meeting held in Cliff Hall last Friday evening passed off very quietly and ended up like a mutual admiration society when votes of confidence in last year's officials were passed and resolutions expressing the thanks of the ratepayers for the work done by the officials during the past year were unanimously carried. This shows that despite the unprecedented and trying times of the past year all were well satisfied with the efforts put forth to carry the town's affairs through successfully.

Mr. Alex Maskeil was chosen as chairman and after calling on Mayor Worts for a review of the year's business the chairman of each department submitted figures showing the expenditures and the work for which it was expended. Every department showed a slight saving over the estimates set at the beginning of the year.

Mayor Worts gave a detailed account of the unemployment relief work undertaken by the town, showing that \$20,000 had been spent on improvements in the water supply at the pump station which, when completed, would provide the town with an up-to-date system. Another \$2,000 was spent on building sidewalks and crossings and the balance of the \$5,000 arranged for was utilized for tearing down old buildings and other smaller undertakings. A result of removing old buildings the town now had about \$1,000 worth of lumber which could be used. His Worship also explained that the town's borrowing power was very limited since the council was in the hands of the Utilities Commission. He said an effort was now being made to secure further relief funds, a portion of which would be used to complete the work of the pump station, and he thought prospects were good for getting it as government officials had approved of the work done so far and had recommended that it be completed. The Mayor also explained that owing to conditions the town's revenue had fallen off about \$6,000 last year through failure of ratepayers to pay taxes, water rates and service tax. On behalf of the council he thanked the ratepayers for their tolerance and co-operation in the hands of the council. He also extended to the Dominion Glass Co. for coming to the rescue of the town when trouble was on at the pump station for putting their expert machinists at the disposal of the water committee.

Chairman Learmonth of the school board reported for the trustees. He said this, the largest spending department of the town, had been run very economically during the past year. The total expenses for school purposes were \$12,232.00 and this was \$610 under their estimates. In motion a vote of thanks to town officials for services rendered during the past year. Mr. C. Buchholz said that it was

N. C. O.'s Entertain Friends at Armory

Good Attendance And a Most
Enjoyable Evening Spent

Non commissioned officers of the local militia entertained in the armory last Saturday evening to a most enjoyable social event, to which members of the militia and their friends were invited.

When the hour to commence the evening's program arrived, the drill hall on the ground floor was well filled with the youth and beauty of the town with enough of the older generation present to make the gathering resemble a big house party, where parents enjoy seeing the young folk having a good time, and wishing they were twenty years younger themselves.

From the interval taken by the parents it looked as though their wish came true.

Dancing was the first order of business announced by the M. C. and the splendid music handed out by C. Thomson and Roy Skjovv together with the excellent condition of the floor, left nothing to be desired.

At eleven o'clock the guests were invited upstairs where tables were set with a most tempting lunch. After lunch Capt. Osgood complimented the N. C. O.'s for the able manner in which they had conducted the event and assured them the building was always at their disposal for such gatherings. The chairman then called on E. L. Stone who reminded the N. C. O.'s and men of the local militia that they were extremely fortunate in having such comfortable quarters which were so suitably adapted for such gatherings, and he expressed the hope that they would take advantage of their opportunities by having many more such gatherings. The speaker also congratulated the local unit for the able manner in which they had conducted the evening's program.

The singing of the national anthem at midnight brought a most enjoyable evening to a close.

Redcliff exhibitors made a good showing at the poultry and pet show in Medicine Hat last week.

The following were the prize winners from here:

W. Lawson won first for best display of chinchilla rabbits at the show.

R. Chien was winner in all classes for Rhode Island Reds and one of his birds was champion of the show. He also got 1st and 2nd for Silver Campons and all awards for ducks in both Indian Runner and East India Classes.

M. Brucker won all awards with both his African and Chinese geese and took the T. Eaton special for fawn pig pen.

It was gratifying to see that things were going so smoothly during such times of depression. The motion was seconded by Mr. Jas. Stratton and unanimously carried.

Before closing the Chairman reminded the audience of nomination day the following Monday and advised all to be in time with their candidates.

Council and Trustees Elected by Acclamation

Only Required Number Nominations For Both

As a result of the municipal nominations held here last Monday the Mayor and four council members were elected by acclamation.

As Mayor Worts was the only candidate nominated he will again be the town's chief magistrate for another term. Councilors nominated were Messrs. H. M. Sangster, A. E. Shaw, A. E. Smith and Canadoc Evans. As there were four vacancies on the council returning Officer F. Baird declared all elected by acclamation. The first three named will be for a two year term and the last T. Jensen, a farmer; M. Dybbel, as his wife, Miss Asa Paarp, his daughter, and Nils Luma, a physician. Considering they were all amateurs and that this was their first appearance in public, all did exceptionally well.

These were: Messrs. Robert Marty, Jm. Stratton, Frank and thoroughly delighted the Congram, and A. J. Learmonth audience.

After the play, tables were set and a most delightful lunch was served. The musical program opened with "O Canada," followed by the Danish and Norwegian National Anthems. Lunch over the floor was cleared and a most enjoyable dance followed for several hours. During the evening Mrs. T. Balmer sang and Mr. E. T. Cooke gave several violin selections. The evening was a great success and was thoroughly enjoyed by all.

Police Agreement Is Made Public

Will Probably Take Effect in
Alberta April 1st

Formal approval has been given by the Alberta Government to the agreement reached by the Saskatchewan with the Dominion Government police transfer. The term specified by the Royal Canadian Mounted Police will take over years instead of seven, and in the policing of the province on each case one-year notice must be given. The agreement is a desire to terminate the present system as a step. The object of the short

The Danes in Town Have Social Evening

Splendid Gathering in L. O. O.
E. Hall Last Friday

Last Friday evening the Danes in town held a social evening in the L. O. O. F. Hall.

All the Danes in town, with a number of other invited citizens were present, making a jolly gathering.

An interesting item of the evening's program was a play, "The Third Sister" put on by a number of young folks, and in the Danish language. The stage represented a living room and was very cosy and home-like. Those taking part were T. Jensen, a farmer; M. Dybbel, as his wife, Miss Asa Paarp, his daughter, and Nils Luma, a physician. Considering they were all amateurs and that this was their first appearance in public, all did exceptionally well.

After the play, tables were set and a most delightful lunch was served.

The musical program opened with "O Canada," followed by the Danish and Norwegian National Anthems.

Lunch over the floor was cleared and a most enjoyable dance followed for several hours. During the evening Mrs. T. Balmer sang and Mr. E. T. Cooke gave several violin selections. The evening was a great success and was thoroughly enjoyed by all.

Annual Meeting of Local Red Cross

Reports Show Branch is Doing
Good Work

The annual meeting of the Redcliff branch of the Canadian Red Cross Society was held in Gordon Memorial school room on Thursday evening last.

The reports of the secretary and the relief officer indicated a very active year in obtaining and distributing clothing, milk and foodstuffs, in sponsoring clinical work and providing hospital, medical and dental service to those unable to meet them. The branch is also endeavoring to maintain its cot in the Children's Hospital in Calgary and is also seeking ways and means to help underprivileged school children.

The treasurer's statement revealed an expenditure of \$174, leaving a bank balance of \$95. Rev. R. E. Pow was re-elected president and Rev. M. Stewart, vice president. Mrs. Ballantyne was elected secretary and Mrs. H. J. Cox treasurer. A. N. Collard was appointed auditor.

Votes of thanks were given to the secretary and relief officer and Mrs. Smith of Rossburg and through his efforts of last year were thanked for the splendid donations of clothing sent. The gratitude of the branch was extended to all donors and to the Review for publicity. The membership of the branch now stands at 63.

It was stated that the agreements will expire at the same time and the federal authorities will then be in a position to negotiate terms of renewal at the one time.

Constable Kitchen says that the reason sun-dogs have been appearing in the sky lately is to remind the people that it is time now to buy a new dog tax.

Hat Legion Members Visit Local Branch

Spirit Evening of Contests and
Musical Program

Local Legion club rooms were the scene of an interesting gathering last evening when about 30 members from the Medicine Hat branch paid a friendly return visit to the comrades here.

Contests in bridge, cribbage, rings, darts and billiards were played and so closely contested were all that when the scores were tallied up it was found that the visitors had won out by only one point.

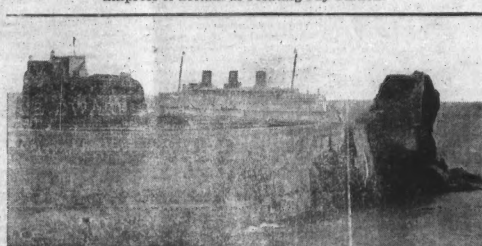

After a most impressive program, made up of songs, choruses, recitations and instrumental selections, was put on, much to the enjoyment and approval of all present, and in which some rare talent was introduced in all lines.

On behalf of the visitors Mr. Pratt, president of the Medicine Hat Legion, thanked the members of the local branch for the excellent manner in which they had been entertained, and feeling that the friendly feeling which had always existed between the two branches, He very kindly offered the services and assistance of his branch to Redcliff comrades in carrying out the aims and objects of the organization and in securing their rights under existing regulations. He strongly advised all returned men to become members of the organization and to give their hearty co-operation in the carrying on of its business.

As a member of the entertainment committee, E. L. Stone welcomed the visitors and thanked Mr. Pratt for services rendered by the sister Legion in the past and for his assurance of continued co-operation in the future. He also thanked all who had contributed to the success of the evening and said he thought such interchanges of visits should be continued. The evening closed with the singing of the National Anthem.

"MAY I USE THE 'PHONE?!"

Empress of Britain as Floating Pay Station.

Madeira got a new thrill recently when telephone communication was established between that pleasant island and London, England for the first time.

The occasion was the arrival of the Canadian Pacific liner Empress of Britain at Funchal on a cruise around the world. This magnificent new liner has the most powerful ship-to-shore telephone system in the world and Madeira were not slow to recognize a chance to make local history.

During her stay there, lying at anchor just beyond the famous Loo Rock, the Empress was host to many visitors. Amongst these were two who came to be called, "May I use the phone?"

Just as casually the telephone operator of the ship called up London and put the callers through over 3,253 miles of water.

Reports from the Empress of Britain, now at Colombo, Ceylon, indicate that the wireless telephonic system is a popular feature of the ship. The longest distance yet reported is Recife, Pernambuco, to Montreal. The liner works on a daily schedule with Canada, through the Canadian Marconi stations at Yanchiche and Drummondville, Quebec, and the Bell long distance board in Montreal.

Photos show: Empress of Britain at Madeira with Loo Rock in the foreground, and a typical bedroom fitted with telephone.

Churches

GORDON MEMORIAL UNITED CHURCH

Pastor Rev. H. Erskine Pow
Sunday, February 7th, 1932.
10 a. m. Church School.
11:15 a. m. Morning Worship.
Subject: "The Vine and The Branches."
7:30 p. m. Evening Worship.
Subject: "The True Christian."

"Character is Eternal Death."

MARY'S CHURCH
Celebration of Mass every Sunday of each month except the first Sunday, at 8:30 a. m.

ST. AMBROSE CHURCH

Rev. Malcolm Stewart, Vicar
On Sunday evening, Jan. 24th, the service in St. Ambrose will be a 7 instead of 7:30.
8 a. m. Holy Communion.
10 a. m. Sunday School.
1st and 2nd Sunday.
11 a. m. Choral Eucharist.
2nd, 4th and 5th Sundays.
11 a. m. Mattins and sermon.
7:30 p. m. Evensong and sermon.

Coal Problems

Meeting of Associate Committee on Coal Classification and Analysis

Dr. H. M. Torsy, the President of the National Research Council, and with Dr. Charles E. S. Smith, Deputy Minister of Mines, Joint chairmen of the Research Council of Canada Committee on Coal Classification and Analysis, is in Pittsburgh to attend the Third International Conference on Bituminous Coal.

Several members of the Associate Committee are expected to attend the Conference including Edgar Stansfeld, Professor of Industrial Research at the University of Alberta; representative of the Federal Department of Mines and P. E. Laith, Director of the Division of Research Information, National Research Laboratories, and secretary of the Associate Committee.

Protection of consumers as well as producers of coal and convenience in international trade (the same applied to one coal in one country may apply to another type of coal in another country) have demanded the quality and value of the various coals be determined, suitable tests developed, and, if possible, an international nomenclature developed. Ever since the organization meeting of the Canadian committee in 1927, the United States and Canadian committees have been making common cause on the problems before them.

At the last meeting of the Canadian Committee, Prof. Stansfeld outlined the results of the chemical survey of Alberta coals which had been carried out by the Alberta Research Council in co-operation with the American and British Departments of Mines. The mineral samples were chosen to represent an irregular section of the province where the widest range of coals could be obtained. Much laboratory work had been done on the thirteen samples of coal obtained, including proximate and ultimate analyses, separations by heavy solutions to eliminate the effect of ash, storage index, strength index, accelerated weathering tests, alkali treatment, ignition temperatures, and fusion points of the coals. Tests were to be made with organic sulphur. Dr. E. H. Boomer of the University of Alberta has been completing out hydrocarbon tests on all samples. It was agreed that the striking results which had been obtained fully justified the large amount of work involved in this investigation.

Dr. R. E. MacKay of the Geological Survey, Dominion Department of Mines, reported for the Sub-committee on the Origin, Constitution, Location and Occurrence of Coal that about 300 samples had been collected varying in rank from peat to sub-bituminous. These were available for examination in the Museum, as were also 150 samples of coal taken from mines in Nova Scotia. The latter were intended for a detailed microscopic study.

A Model Touring Car

Masterpieces Of Woodwork Just Completed By California Ray

Irvin Grumm, the top "winning wizard" of Hercules, Pasadena, Calif., has just completed a masterpiece of woodwork, a model touring car of a well-known make, which was completed after 212 hours of work. It is built to exact and finished to the most minute detail. Seven hundred and seventy-six pieces of sugar pine, birch and balsa were used.

The model is about 12 inches long and 5 1/2 inches high and weighs only 4 1/2 pounds. The hood can be raised, showing a tiny wooden engine. The wheels are delicately carved of wood and are movable. Experts in wood and model building of its type they have even seen.

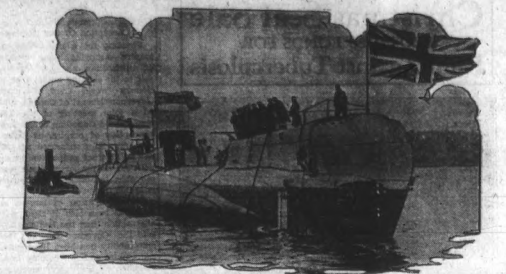

The light emitted by glowworms has the same effect on photographic plates as that of X-rays.

"You are my first love," "What about Phyllis?" "Oh, she was my first—Buen Hombres, Madrid."

W. E. U. 1918

BRITAIN'S NEWEST GUARDIAN OF THE SEVEN SEAS

Britannia received a powerful ally in her job of guarding the seas when the new British submarine "Sworðbird," the latest and most modern underwater fighting craft, was launched at Chatham. While sworðbirds are not exactly the type of fish creature you'd make a house pet of, this "Sworðbird" is certain to be far more deadly than the undersea creature it is named after, if occasion ever demands.

Develops Canyons Out

Britain Will Market Seventy Million Tons This Year

Manchester's three-day conference of fruit canners this week in connection with the Imperial Fruit Show, was notable for the exhibition of a wonderful British-made canning machine.

This machine is the invention of a son of the late Dan Leo, star salesman of the London music hall in its heyday.

By its means one simple operation takes the place of a whole chain. The machine occupies 64 square feet of floor space, instead of ten thousand, and costs only \$4,500 in comparison with old prices of \$25,000, yet provides an increased output.

Canners from all over the world attended the conference at which Britain has culminated America in turning out up-to-date canning plants. Great Britain anticipates a production this year of 70,000,000 cases of home produce, compared with 10,000,000 cases three years ago. She is now sending canned strawberries to America, the home of canners, and also shampoos to China, in which country, together with Japan, Malaya and other Pacific countries British canners look to conquer a market.

How News Would Appear

IF AN FIVE-ALPHA HAD TO BE PAID FOR

If newspapers were to ask, and the headlines were to pay for all the free advertising which so many of the latter prefer not to believe in and yet expect, the average news story in your favorite paper might perhaps run something as follows:

"Mrs. Minnie Hake, of this city, received painful injuries today when she was run over by a Fordian (Adv.)"

"A man on the farm in 1933 must have a close relationship with the fellow in town than ever before," he said. To 100 junior farmers who attended as guests of the club, Dr. Christie advised "Don't get into your mind that the man who drives the team on the farm is doing all that can be done for agriculture. The man in town who co-operates with the farmer from 100 different angles is just as important."

He emphasized the need for thought among farmers. "The boy who is thinking as he works in the field has a great chance in the future," he said.

Systematic Saving

The penny bank patronized by Toronto school children has \$6,000,000 in deposits, 34,000 regular weekly depositors and deposits of \$700,000. It has done a great work in familiarizing children with the possibilities of systematic saving.

One of the world's most luxurious yachts has a drawing room furnished as a Chinese temple with furnishings 250 to 300 years old.

Only Those Who Persevere Accomplish Anything Worth While

All the performances of human art, from the most sublime to the most trivial, are instances of the resistance force of perseverance; it is by this that the quarry becomes a pyramid, and that distant countries are united by cables. If a man was to compare the effect of a single stroke of a pickaxe, or of one impression of the spade, with the general design and last result, he would be overwhelmed by the sense of their disproportion; yet these petty operations incessantly continued, in time surmount the most difficult obstacles; the mountains are leveled, and oceans bounded, by the slender force of human beings—Johnson.

Swearing Off

Aberdonian (to fellow passenger who has given him a third fill for his pipe): "You'll maybe think it queer to see me takin' no more filla' o' yer grand tobacco, but the fact is I'm tryin' hard to stop smokin', and I never carry any o' my sin."

In tropical countries covered with luxuriant vegetation the rainfall is seldom less than 60 inches a year.

The Next Big Boom

When This Turns Canadian Farming Will Progress Rapidly

Speaking at a public meeting, Robert Miller, the veteran live stock breeder, said that he had experienced, and all agriculture had experienced, six or seven depressions in the course of his lifetime. On every occasion agriculture was more prosperous after the depression than before, and he predicted that when the tide turns, farming in Canada will progress with rapid strides.

Economists, financiers and statesmen have failed in these 50 years to agree on the "common cause," so we have had booms and depressions following each other in regular succession. Optimists are already predicting a turn in the tide, and some are even predicting a boom bigger and more rapid than anything in the past. A period of prosperity is a time not to incur debt and adopt extravagant standards of living, but a time when one should add to his assets and prepare for the cloudy weather or the rainy day. Governments, as well as people, have learned that lesson. —Farmers' Advocate.

Need For Co-Operation

Farmers and City Dwellers Should Work Together

Need for co-operation between city dwellers and farmers was stressed recently by Dr. George I. Christie, president of the Ontario Agricultural College, addressing a Toronto service club.

"A man on the farm in 1933 must have a close relationship with the fellow in town than ever before," he said. To 100 junior farmers who attended as guests of the club, Dr. Christie advised "Don't get into your mind that the man who drives the team on the farm is doing all that can be done for agriculture. The man in town who co-operates with the farmer from 100 different angles is just as important."

He emphasized the need for thought among farmers. "The boy who is thinking as he works in the field has a great chance in the future," he said.

WORLD HAPPENINGS
BRIEFLY TOLD

Migration from Great Britain to the Dominion is at present encouraged as assisted at present, according to Hon. J. H. Thomas.

Lord Elphinstone moved a resolution in the House of Lords, urging no delay in calling the Imperial Conference in Ottawa.

Gold has been discovered in considerable quantities on the Homestead mine at Perry Creek in the East Kootenay, according to information received at Nelson, B.C.

Sir John Gilmour, Minister of Agriculture, has been appointed member of the British cabinet committee to attend the Imperial Economic Conference in Ottawa.

Henry Hobbins, Port Arthur, Ont., has claimed bounty on the skins of nine timber wolves. He will receive \$220 for this record number of timber wolf skins.

No part of the world has as much assured economic future as Canada, Col. Stanford Macdonald, United States Minister to Canada, told the New England Council at Boston.

Reconstitution of the British House of Lords to allow members from Canada and other Dominions hold seats is suggested by "Scrutator" writing in the Sunday Times.

Miss Ethel Catherwood, Saskatchewan Olympic champion, has taken up residence in San Francisco, where she will remain until after the 1923 Olympic games.

Edward Alexander McCourt of Kitchy was declared Abolitionist of the year at a meeting of the selection committee held in Edmonton.

Mccourt has a brilliant scholarship and athletic record, and is a member of the University of Toronto.

Production of railway rolling stock in Canada during 1920 was valued at \$104,992,703, the second highest figure on record. Of the 37 firms engaged in the industry four are in Manitoba and three in Alberta.

Dane Rachel Crowley, D.B.E., who was in Vancouver on her way to Great Britain from the conference of Pacific relations in the Orient, had words of praise for the work of the League of Nations in the China-Japanese controversy.

Drouth Resisting Plants

Introduction Of New Type Of Grasses Might Be Of Great Value To Canada.

Dr. G. McConkey, formerly of the Ontario Agricultural College at Guelph, expresses the opinion that in Russia might be found several plants of immense value to Canada and the rest of the world. He suggests a new kind of exploration, a search for plants which may with the work of scientists bring millions of dollars to Canada. In particular he thinks a search should be made, for drouth resisting strains of plants and grasses in Russia, and plants resisting high winds and heavy snows in Scandinavia.

Since Dr. McConkey made his report to the Empire marketing board, his theory has been confirmed by the discovery in Manchukuo, South Africa, of hitherto unknown drouth resisting woolly fleeced sheep which are stated to be capable of supporting stock for a year without rainfall.

Uses Of Silka Spruce

The fuses of the Silka spruce are long, straight, of uniform structure, and evenly distributed through the wood, states the Forest Service Department of the Interior, Canada. These features give it a quality of resistance to rot and decay.

It is therefore much utilized in the manufacture of organ pipe, piano soundboards, and parts of other stringed instruments.

Dragon flies in prehistoric times had a two-foot wing expansion.

"We must do what a lawyer does when he has no client, or a doctor when he has no patients."

"What is that?"

"Marry"—Paul, Vienna.

Drouth Remedy
Is Sought

Saskatchewan Commission Lays Plans For Intensive Study Of Dry Conditions

Saskatchewan's commission on conservation and afforestation, appointed by the Provincial Government to investigate the causes of the recurrent drouth in the southern portion of the province, laid definite plans for study and research at its initial meeting. Saturday, November 13.

Under chairmanship of Hon. J. P. Bryn, the Commission formally accepted the responsibility and duties of its membership to study various aspects of the subject as suggested in a report by Mr. Bryn, of a preliminary survey made by him.

Members present at the meeting were: Hon. Mr. Bryn, Chairman; Mr. H. Macdonald, Dean of Engineering; Mr. J. H. Thomas, Minister of Agriculture; Mr. W. T. A. Patrick, M.P., Toronto, and Mr. J. P. O'Leary, Consulting Engineer.

Mr. Patrick, Minister of Agriculture, was present at the meeting, but was unable to attend the Imperial Economic Conference in Ottawa.

After discussing the various suggestions arising from the preliminary survey, the Commission formally accepted the responsibility and duties of its membership to study various aspects of the subject as suggested in a report by Mr. Bryn, of a preliminary survey made by him.

Members present at the meeting were: Hon. Mr. Bryn, Chairman; Mr. H. Macdonald, Dean of Engineering; Mr. J. H. Thomas, Minister of Agriculture; Mr. W. T. A. Patrick, M.P., Toronto, and Mr. J. P. O'Leary, Consulting Engineer.

Mr. Patrick, Minister of Agriculture, was present at the meeting, but was unable to attend the Imperial Economic Conference in Ottawa.

Christmas Seal Sale
PROVIDES FUNDS FOR
Fight Against Tuberculosis

Ideally located amid surroundings of great natural charm in the beautiful valley of the Saskatchewan river, the Tuberculosis Sanatorium is an institution of which this province is justly proud. It is one of the best equipped and most modern of its kind in Canada, and is the result of the efficient management of the late Mr. J. H. Thomas, who was in charge of the institution during his life.

The sale of Christmas seals is the best known and most successful of the many methods of raising funds for the fight against tuberculosis. It is a simple and effective method of raising money for the fight against tuberculosis, and is the result of the efficient management of the late Mr. J. H. Thomas, who was in charge of the institution during his life.

Business Men Are
More Optimistic

Increasing Confidence Is Reported By Leading Advertising Agencies

A good business year is expected by leading advertising agencies, which business men have been a ray of light and are still looking forward, J. J. Gibbons, president of J. J. Gibbons, Limited, found large manufacturers more ready to discuss plans for advertising in the coming year. They are now more ready to spend money, he said. He looked for a big development in the early months of 1923, although he did not look for any boom in business.

H. H. Priddy, Toronto manager for A. McLean, Limited, said he had noticed a fine response from business men who, while unwilling to admit prosperity had come back to Canada through a rise in the price of wheat or even other influences, are beginning to believe that they will work their way out very soon. "No one is now feeling blue," he said. "Higher wheat prices have made more of the path to a growth in business, and possibly good times sooner than we expected."

Christmas business, he thought, would tell a good part of the story.

"There is a good deal more confidence now," said James Fisher, advertising agency, "manufacturers are now making plans for the coming year, and the outlook is bright. Things seem to be settling down to sounder business. There is not that shocked-out feeling that was around a short time ago. Now, in 1923, there was a serious lack of confidence, Mr. Fisher recalled. The first sign of returning prosperity was determined to become evident when manufacturers gradually became more determined to make plans for the coming year. The situation is evident again now, and seems to forestall prosperity at no very distant future," he said.

To Extend Park Highway
New Road To Pacific Coast Via The Yellowhead Pass

A new and attractive section of Jasper Park, one of the largest of the Dominion's national parks, is being made available for motorists with the completion of a new section of highway to the boundary of British Columbia. Work on the first 15 miles of the new highway, which will eventually join Alberta, with the Pacific coast, is well advanced.

A road, not yet yet to highway standards, is being built from the Yellowhead Pass to Jasper National Park. Between the park and Prince Rupert, British Columbia, work on the first 15 miles of the new highway, which will eventually join Alberta, with the Pacific coast, is well advanced.

IN LOVING MEMORY

DUTTON

In ever loving memory of our darling son Joseph Gordon, who passed away Feb. 2nd, 1929. From his loving Mum, Dad and sister, Mountain Park Alta. Death claimed the priceless treasure God to us had given; He took away our lovely flower, And planted it in heaven.

DUTTON

In loving memory of Joseph Gordon Dutton, who passed away Feb. 2nd, 1929. From Grandma, Grandad, Uncles, Aunts and Cousins. A silent thought, a secret tear, Keeps his memory ever dear.

Under the auspices of Diamond D Football Girls

Alberta Potteries Limited

OFFICE, Redcliff, Alberta

Authorized Capital 750 Shares without
Nominal or Par Value

Present Issue: 200 Shares at \$50.00 Per Share

The prospectus dated the 22nd day of October, 1931, relating to the above issue to which intending applicants for shares are referred, has been duly filed with the Secretary of State of Canada, Ottawa, Canada.

The directors of the company are: Jesse Wyatt, of Medicine Hat, Alberta, Vice-President; Cecil T. Hall, Druggist; John Thomas Cairns, Miner; and James Baldry, Mechanic, all of Redcliff, Alberta.

Copies of the prospectus may be obtained at the office of the company on applying in person or by letter to Mr. J. W. Wyatt, the Secretary, addressed to box 77, Redcliff, Alberta, or 503 Seventh Street, Medicine Hat, Alberta.

The said prospectus gives the particulars required by the Companies Act, being chapter 37 of the revised Statutes of Canada, 1927, and mentions other particulars relating to the company.

On the basis thereof only applications will be taken; this advertisement not being intended to be a prospectus within the meaning of the said Companies Act.
